

DNA Manufacturing Solutions 4

Faster
More flexible
More practical
More complete
More technological

DNA 4 is all this and more

Faster because it takes full advantage of all the technology made available by ITACME partners.

More flexible because simplifies the dialog through WEB Service with all vertical applications.

More practical because centralizes in cloud on the server some of the services delegated to the user, moreover it takes advantage and evolves the ZCA (Zero Client Administration) technology developed by Itacme.

More complete because Itacme follows the development policy that has always distinguished itself in the market.

More technological because it aligns to the new versions of its partners, among them Oracle, Gupta, Microsoft, QlikTech, exploiting their features.

However....

The Companies working with DNA 3 must not have any worries. The compatibility between the two versions is total.

All the necessary duties to install the version 4 is played by an automatic procedure that our technical staff runs for them.

What is new in version 4

Continue exploring this website and you will find out by yourself. Open the Products section and you will discover many things you do not know though already using DNA.

You do not have time or desire?

A little taste:

- **Business Intelligence:** all modules fully renovated
- **Warehouse Management System:** all the logistics functions, from the incoming to the delivery, in the palm of your hand
- **Purchases portal:** dialogue with your suppliers all over the world
- **Sales portal:** your B2B and B2C market inside DNA
- The **quality** that distinguishes your company is managed in DNA
- MES: the **Manufacturing Execution System** integrated with logistics
- DMS: the **Document Management System** with only a click
- **Electronic Invoicing:** a small step for DNA but a great technological advancement
